Index Financial Advisors LLC

Quarterly Market Analysis June 30, 2008

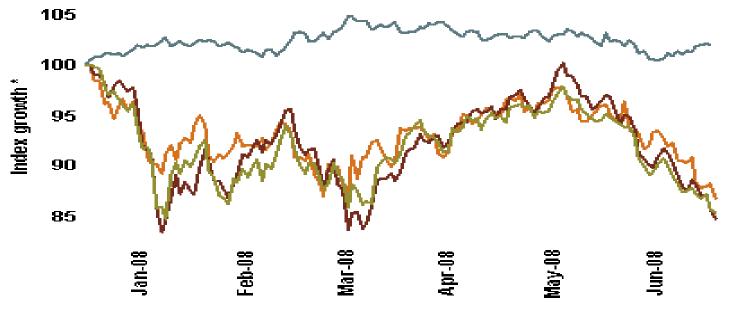

Market Commentary (202008)

- □ US financial crisis begins to stabilize in late March
- Equity markets rebound in April/May, near positive for 2008
- But oil and commodity prices continue to rise dramatically
- Inflation becomes concern for central banks worldwide
- □ US housing, employment, consumer spending remain weak
- □ Fed holds interest rates steady at 2%
- Equity markets reverse course in June, establish new lows
- Dow Jones close to bear market (down 20% from Oct. high)
- Future of economy, equity markets tied to oil prices
- Potential tipping point could burst oil price bubble
- □ But risk of supply disruption (e.g. Iran) remains high
- □ Market volatility will likely continue in Q3 and beyond
- □ Focus on long term strategy, diversification, costs, taxes
